MIOR ROLL

The rollable aluminium access ramp.
No drilling. Ready to use instantly.

• 400 kg load capacity

• 6082-T6 aluminium

• No drilling required

• Modular length

• Made in the Netherlands

— THE PRODUCT

Rollable. Modular. Instantly ready.

MIOR ROLL is a rollable aluminium access ramp that unfolds in seconds and is immediately ready for use — no drilling, no installation required. Thanks to the modular system of 20 cm sections, the ramp can be adjusted to any desired length, making it suitable for any threshold height or situation.

Any height, any situation

Adjustable in steps of 20 cm. From a single low threshold to multiple steps — MIOR ROLL adapts without any modifications to the environment.

No drilling, no damage

No permanent installation required. The ramp stays in place through its own weight and anti-slip profile. Ideal for rental properties and listed buildings.

Safe and weather-resistant

Raised side guards on both edges prevent wheels from slipping off. The anti-slip surface performs reliably even in wet conditions.

Suitable for every application

Compatible with wheelchairs, mobility scooters and rollators. At home, in care facilities, hospitality venues or at events — MIOR ROLL works everywhere.
